

About

I am a dedicated Fullstack Developer with a strong focus on backend development. As the Co-Owner and CTO of Miova, I steer our team towards innovative digital solutions. Passionate about technology, I enjoy working on my own open-source projects and contributing to the open-source community. With a commitment to excellence, I continuously seek to optimize processes and drive innovation in every project I undertake.

Work Experience

| | | |
|-------------|---|--|
| 2023 — Now | Co-Owner & CTO at Miova Full-Service Digital Agency Gaziantep | Miova is a pioneering full-service agency known for its innovative solutions. As Co-Owner and CTO, I lead our team in delivering creative software and design solutions, addressing industry challenges, and supporting our clients' business goals. We continuously evolve to meet the demands of today and the future. |
| 2021 — 2023 | CTO (Formerly Lead Developer) at Verymoney Gaziantep | Verymoney is a startup that connects companies directly with users through influencer marketing collaborations. The platform unites influencers and businesses, simplifying the process of advertising products and services to a targeted audience. |
| 2020 — 2021 | Backend Developer at Munazzo Netherlands | Munazzo is a large-scale system that connects suppliers and buyers for dropshipping. It streamlines the process by integrating orders, invoices, shipping, and marketplaces, providing users with convenient access to everything they need in one place. |
| 2018 — 2020 | Backend Developer at Miova Full-Service Digital Agency Gaziantep | Miova is a comprehensive 360-degree full-service agency that caters to the needs of its clients with the help of its talented team. As a back-end developer, graphic designer, I was proud to be a part of the team that helped Miova fulfill its clients' desires and bring their visions to life. |

Education

| | | |
|-------------|--|---------------------|
| 2020 — Now | Master of Arts Program in Management Information Systems at Anadolu University Eskisehir | |
| 2016 — 2018 | Computer Programing at Gaziantep University Gaziantep | Graduation GPA 3,20 |

Side Projects

- | | |
|------|--|
| 2024 | Blade Hügeicons A package to easily make use of Hügeicons in your Laravel Blade views. |
| 2023 | Cloudflare Turnstile Integration for Filament A plugin to help you implement the Cloudflare Turnstile into your Filament panels. |

Projects

- | | |
|------|--|
| 2024 | Dalyana Dalyana is a France-based furniture company with over 2000 products sold across three countries. This project involved creating a responsive, user-friendly design from scratch, enhancing the e-commerce experience and supporting Dalyana's extensive product catalog and international sales. |
| 2023 | Granitaş Our web project for Granitaş, initiated in 2023, represents a complete overhaul of their online presence. Utilizing the latest full-text search, frontend, and backend technologies, this endeavor transformed Granitaş's digital interface into a modern, interactive experience. The project encompassed a comprehensive web development process, from initial concept to final implementation. |
| 2022 | Verymoney Verymoney is an innovative platform that connects companies with influencers for seamless marketing collaborations. As CTO, I played a key role in developing and scaling this startup. The platform simplifies advertising for businesses by matching them with the right influencers, creating successful marketing campaigns through advanced technologies. |
| 2022 | Metalium Concept I developed a Shopify-based e-commerce project for Metalium Concept in 2022 to provide their customers with a modern and user-friendly shopping experience. The site's design was optimized to be compatible with different devices, and we added customizable functions such as fast payment systems, order tracking, and promotional codes. |
| 2021 | Gaziantep FK The web site project developed for Gaziantep Football Club in 2021 provides fans with easy access to information about the team, including fixtures, player information, team history, and information about the management, administrative, technical, health and support teams. |

2021

Dünya Demir Çelik

As a project for my family business, the site provided a modern and user-friendly platform for showcasing the company's products and services. Utilizing the latest technologies, the site was designed with mobile compatibility in mind, making it easily accessible from a variety of devices. The comprehensive page structure provided detailed information about the company's offerings, ensuring that potential clients can easily find the information they need.
